

I understand that the FCC is considering changing Indiana's Telephone Privacy Law. Since signing up for this program we have received 2 solicitation calls in the past 11 months. Before this law it wasn't uncommon to receive that many calls in one evening. It has been wonderful to no longer be interrupted in the middle of dinner or working on a project by an unsolicited sales call. In my opinion the FCC should leave Indiana's Telephone Privacy Law alone. Remember... If it ain't broke, don't fix it.
